The history of Avantek

In 2015, the Flamstead Group was acquired by NYSE-listed Quanex Building Products. To represent the organisation's growth and the expanding range of specialist machinery offered, the Wegoma GB name was changed to Avantek Machinery in February 2016.

The name Avantek is made up of two words; avanti: to move forward in Italian and tek: symbolising the cutting-edge technology used in the Avantek Machinery ranges.

Avantek Machinery was initially established as Wegoma GB in 2003, and sought to provide fabricators throughout the UK and Ireland with high quality products and exceptional service.

In 2014, WegomaGB joined the Flamstead group of companies.

The showroom

In 2017, Avantek Machinery opened its world-class showroom, complete with innovative Supercut machining and cutting centres, welders, corner cleaners, mitre saws and a range of other specialist fenestration machinery.

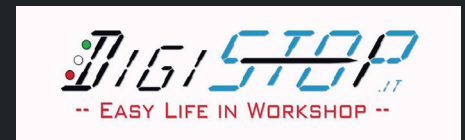

In the showroom, the Avantek team can demonstrate how the machinery works and offer a glimpse of the high-quality results. To visit the Avantek Machinery showroom, please contact info@avantekmachinery.co.uk.

Products and services

Providing the highest of standards, Avantek Machinery supplies the fenestration industry with specialist machinery from stock or on short leadtimes. Well-known for its exceptional service and support to fabricators, Avantek offers personalised support to individual customers, streamlining manufacturing processes and helping to cultivate a knowledgeable workforce.

Whether you're fabricating PVCu or aluminium, Avantek can help you to produce consistently perfect results. **Avantek Machinery is the UK specialist and stockist of:**

Low costs without compromising quality, consistency or technical proficiency

An empathetic and responsive nature for clients' needs whilst designing products

Four decades of unparalleled experience in the industry

A dedicated, handpicked workforce with a high commitment and adaptability for ever-changing demands

The highest quality machinery brands within the window fabrication market

Excellent service, professional standards and customer relations

Innovation and collaboration

Avantek Machinery provides much more than top of the line, cutting-edge machinery to window fabricators throughout the UK. From parts for machines and service to bespoke factory layouts, team training and even working alongside systems houses to help create products which are designed with the fabricator in mind, Avantek Machinery is at the forefront of specialist window fabrication machinery technology.

As part of bringing a UK-first PVCu product to market, Avantek Machinery worked with URBAN, Timberweld®, fabricators and Linar to achieve the best fabrication solution - all of them designed to make the fabricator's life easier.

That product is the Resurgence timber replica window - exclusively available from Linar.

Apprenticeships

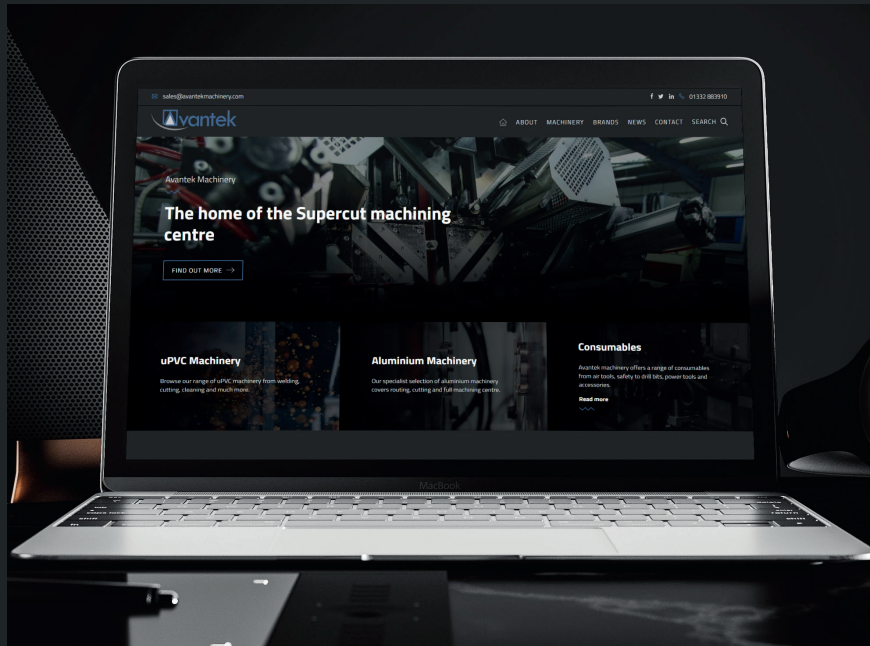

Young people and a vibrant workforce are the key to a successful operation. That is why Avantek Machinery has a comprehensive apprenticeship programme for talented local youths, and for current employees.

Avantek Machinery has always been committed to helping close the skills gap, providing a development culture where talent is nurtured and encouraged.
