

Avantek Supercut 5 & Supercut 6 Automatic Cutting and Machining Centres

The Supercut range of cutting and machining centres ushers in a new era in the supply of machines for the PVCu manufacturer. Available in either Supercut 5 or Supercut 6 formats with feed from either right or left, the Supercut Cutting and Machining Centres provide you with the ultimate in productivity and efficiency.

Simultaneous routing

Batch optimisation

Process Capability

- Auto-measuring and re-optimisation for off-cuts
- Automatic 10 bar in-feed table
- Fully integrated, dynamic batch optimisation software
- Windows 7 / 64-bit software
- 10/12 programmable routing motors
- Zebra thermal label printer
- Twin bag extraction
- Waste conveyor for easy waste removal
- All parts available from stock
- Dedicated engineers for online and telephone support

Technical Data

Working Voltage 400 V 50 Hz
 Drawing of Current..... 25 A
 Electrical Power 30 CW
 Feeding Min..... 5 x 4,00 qmm
 Starting Fuse 32 A
 Sound Level <= 85dB(A)
 Working Pressure 8 bar
